

Option ASM 101

Option LEM 101

Option PKM 101

Option WRM 101

Option modules of the 101 series

Wide range of functions

Compatible with the K + G app

Easy to install

The option modules are plugged onto SHEVS control centres/controls (main units) with spacer bolts and connected to them via a ribbon cable. The settings are made via the menu of the main unit. Depending on the type of the main unit, different settings may be available.

As all option modules have the same mounting dimensions of 55 x 55 mm, they can be interchanged at will on the slots of the compatible main units.

ASM 101 (Connection module)

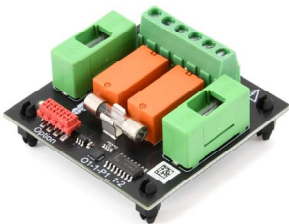

Part no.: 8139 0080 0000

- Additional connection options: two 24 V– outputs, one input
- Forwarding off selectable system messages via two outputs
- Input for one PFC (NO or NC) for processing external messages

LEM 101 (Ventilation extension module) Part no.: 8139 0090 0000

- Ventilation in automatic mode, CLOSE mode or manual mode
- Connection of an automatic switch (e.g. thermostat, timer) and a selector switch for selecting the operating mode

PKM 101 (PFC module)

Part no.: 8139 0010 0001

- Extension through two potential-free changeover contacts
- Forwarding of selectable system messages via the PFCs

WRM 101 (Wind and rain module)

Part no.: 8139 0020 0000

- Connection of one wind and rain sensor
- Forwarding of selectable system messages via a PFC
